
An Introduction This is a resource for Tamil learners of Basic Electronics. It has been compiled to provide an overview of the subject, to provide background information on the industry, and to offer some related topics. It can be seen as a primer for students who are starting their studies in this field. Teachers can use it as reference material for students studying their first year of Engineering/Science courses. Readers with a basic knowledge in electronics and electronics in industry would find this resource useful. The focus of the online resource is: "What does it mean to be an Electronics Engineer?" No jargon, no technical language. The focus is on explaining the basics, and addressing motivation questions; for example: "Why learn electronics? What can you do with electronics? Where can you use it?"
