Pretty good breakout style game with a ball speed control mechanic. 8 shitrats out of 10.. One of Choice Of Games' most compelling titles, and a great way of exploring the multiple means of resistance within race-based incarceration (drawing heavily from Indian reservations, the Japanese American internment, etc), except with werewolves. Explorations of violent and nonviolent resistance, and questions of autonomy and allyship, are explored with a rigor and seriousness that you'd rarely see in most games. Great work by Jeffrey Dean, and I can't wait for the sequel!. It's good to see more japanese arcade STGs coming to Steam.

Simple, yet challenging, even on the easiest of settings.

Lots of "oh ♥♥♥♥" moments await.. Very fun and addicting. The game might seem simple at first, but the characters can be very complex and lead to multiple strategies. Also there is a nice motivation to play all modes with all character so that you can get all your accolades.. I'm old enough to remember the mega cd and when night trap was first unleashed. True, it was controversial, but like most things people tend worry about things they either do not understand or change. In the case of night trap not so about the concept but the technological jump it represented. The earlier editions of this game were playable yet the video was grainy. This 25th anniversary release really adds the sparkle to a fun classic!. God save our gracious Queen,

Long live our noble Queen,

God save the Queen;

Send her victorious,

Happy and glorious,

Long to reign over ants,

God save the Queen.. Energizing.. Played the first 30 minutes. The setting looks stunning and the game runs very smooth. I was a bit wary of the game as there's nothing out there to watch gameplay wise other than a few trailers. Priced at \$30, it's a bit of a gamble but one I'm glad I took. When I first saw the trailer, the movie Gangs of New York sprang to mind, whether this is in a similar vein only time will tell. I was a bit disappointed the dialogue isn't voice acted, for \$30 I expected it to be but that doesn't detract from the game.

I'm looking forward to continue playing the game, I've only encountered one "fight" but it seems to have a strategy to it.

Check out the video below (no commentary) and see whether the game is for you.

Quite a hoot - an enjoyable amount of progression of the roster (levels, equipment, abilities), with a solid atmosphere, sensible writing, and excellent music. The combat is acceptable -- while there's some strategy to be had with the cognition points mechanic, it would benefit for more varied terrain mechanics (e.g, the role of cover is extremely limited, could use greater verticality, or destroyable objects, etc) and more enemy types.. So far so good. That graphics and sound, the atmosphere, and especially the camera angles are highly reminiscent of classic Resident Evil and Silent Hill games. The only downside to the 1st part in my opinion is the final battle (if you can call it that) with the shark, but otherwise this is a good start and I can't wait to see what the rest has in store. If you're hesitant to get this, just keep in mind it's only \$5 and should keep you busy for around 2-3 hrs.. Not my favorite game in this series. It was too easy and there wasn't a lot to figure out. Took under 3 hours.. Really enjoyed it! Great variety in monsters, fun puzzles, nice art. It may not be as deep as some of the other gridders, but that didn't take away from the experience. Would love to know # of secrets per level :). Why is this so great? It's just an homage to simple, old educational games, but it's more fun than it seems like it should be for the 20 minutes it lasts, thanks to the goofy story and oddly appropriate music.. Entertaining game with simple strategy elements.

I normally don't play card based or strategy games, but I really enjoyed this one. Great for relaxing with a cute, little story.
