About This Game

Story

You are in the void realm between hell and earth. A 'kindly' spirit named Fate explains you have been sent here to prove you are worthy of redemption from your mortal life. You are tasked with reaching the top of a tower.

•Creepy dark atmosphere.
•Branching story dialogue.
•Rewarding puzzles
•Hidden secrets and areas.
•Beautifully haunted world.
•Full 3D sound attenuation.
•Guaranteed pain and suffering.

Puzzles

The puzzles and challenges will get tougher and more complex the higher up the tower you go. Basic timing events to mind games and trickery, by the time you reach the top, you will know true suffering.

Sound Design

Full sound attenuation (3D Sound) on EVERYTHING, from gusts of wind, drops of water, to that mysterious chain rattling in the distance. You will hear exactly just how far, and in what direction every sound is coming from (Best used with headphones). True echoes and reverberation are used throughout the entire game. Every sound emitted will bounce off materials with different absorption properties (stone, cloth, glass etc) and calculate the distance travelled to get back to you and adjust frequency, delivering a hauntingly realistic accurate interpretation of true sound.
